

# Broadband Horn Antenna

## OBH-08120

OBH-08120 double ridge horn antennas operate broadband from 800MHz to 12GHz. The antenna supports linear polarized waveforms.

This antenna is appropriate to the test of wireless and telecom communication antennas. High gain and low VSWR permit the measurement of weak signals and the generation of high field strengths without any significant return loss.

OBH-08120 is calibrated individually in line with ANSI C63.5-2006, making the antennas ideal for EMC/RF measurements.

OBH-08120's radiation pattern contains only one single main lobe over the entire frequency range without any other side lobes.

The antenna is low weight within 2.1kg and has rugged construction.

### Features

Linear polarized with high polarization purity

RFrequency from 800 MHz to 12 GHz

Low return loss / VSWR

Wide bandwidth

Uniform Gain

High Power Handling Capability

Radiation pattern contains only one main lobe over the entire frequency range

Each antenna is calibrated individually in line with ANSI C63.5-2006

### PRODUCT DIMENSIONS

### Electrical Specifications

Part Number	OBH-08120
Type of Antenna	Dual-Ridge Horn
Frequency Range	0.8-12.0GHz
Gain	6-15dB
VSWR	<2.0
Polarization	Single Linear
Cross-Polar Discrimination	>45dB
Impedance	50Ohms

### GAIN

### VSWR
